Re: Husky Energy - Lloydminster, Saskatchewan  
DDGS Dryers Upgrade and Regenerative Thermal Oxidizer  
Cobra Project #30488

Dear Mr. Hodgson,

Cobra would like to take this opportunity to commend Saskarc on the quality job you performed for us regarding the supply, fabrication and delivery of large diameter stainless steel rectangle-to-round transition spools, formed carbon steel reinforcing plates and various sized stainless and carbon steel square and round ducting for this project.

The success of our project could not have been possible without the responsiveness on your part to our client's needs with early identification of engineering/drawing discrepancies during the drafting phases, the organized execution and communication related to the fabrication and delivery of the critical components for this valued project.

We look forward to working with your company again in the near future and have no issues recommending Saskarc to others who are also in need of similar fabrication needs.

Very truly yours,

Bruce Gordichuk, M.B.A.  
Senior Program Manager
