**Re: CG321 – Boundary Dam ICCS Flue Gas Duct Project – Duct Insulation and Steel Fabrication**

In September 2012, Graham Industrial Services, a JV contracted Saskarc Industries Inc. to supply 1000 tons of structural steel and the insulation and cladding of (19) duct sections off site, as part of the Boundary Dam Integrated Carbon Capture and Sequestration Project. As part of their contract they successfully staged the ducting delivery to ship 'Just in Time' minimizing double handling.

Saskarc's project management team conducted themselves professionally and completed the project. As additional fabrication requirements arose Saskarc provided a quick turnaround to aid Graham in completion of the project.

Sincerely,

A handwritten signature in blue ink, appearing to read "Kelly Wedewer".
